Overview

The following correlation features the knowledge and skills that students are introduced to in JA Capstone Programs. The correlation is not meant to be exhaustive, nor is it intended to infer that any one resource will completely address any given standard. It is designed to show how *JA BizTown*[®] and *JA Finance Park*[®] will enhance or complement efforts to meet educational standards.

JA BizTown helps prepare students for a lifetime of learning and academic achievement through daily lessons, hands-on activities, and active participation in a simulated community designed to support differentiated learning styles. *JA BizTown* students develop a strong understanding of the relationship between what they learn in school and successful participation in an economy.

JA BizTown encompasses important elements of work-readiness, entrepreneurship, and financial literacy, providing students with a solid foundation of business, economics, and free enterprise education. The program content augments students' core curriculum in social studies, English language arts, and mathematics. Throughout the program, students use critical-thinking skills to learn about key concepts as they explore and enhance their understanding of free enterprise. *JA BizTown* is correlated in this document to the New York Social Studies Framework for the elementary grades (4, 5, and 6.)

JA Finance Park helps students build a foundation upon which they can make intelligent financial decisions that last a lifetime, including decisions related to income, expenses, savings, and credit. *JA Finance Park* lessons provide a highly relevant learning opportunity in which students apply Language Arts and mathematics skills to solve problems arising in everyday life. The lessons also address fundamental business and economic concepts, explore career interests and opportunities, and develop work-readiness skills.

The *JA Finance Park* program is composed of 13 required teacher-taught, in-class lessons. It culminates in a hands-on budgeting simulation that is implemented either at a JA Finance Park facility, mobile unit, or virtual site. Additional extension activities are available for each lesson topic. Lessons are offered in a traditional classroom presentation format designed for middle-grade students, and in a Project-Based Learning (PBL) format created for high school students. Both provide educators a method of delivery that will best meet the needs of their students.
